Business Development Director

Compliance & Risks

Hidden Cost of Compliance Issues

An illustration of an iceberg floating in the ocean. The tip of the iceberg, which is visible above the water, represents the 'Perceived cost' of poor compliance processes. The much larger, submerged part of the iceberg represents the 'True cost' of poor compliance processes. The background is a teal gradient with stylized clouds and waves.

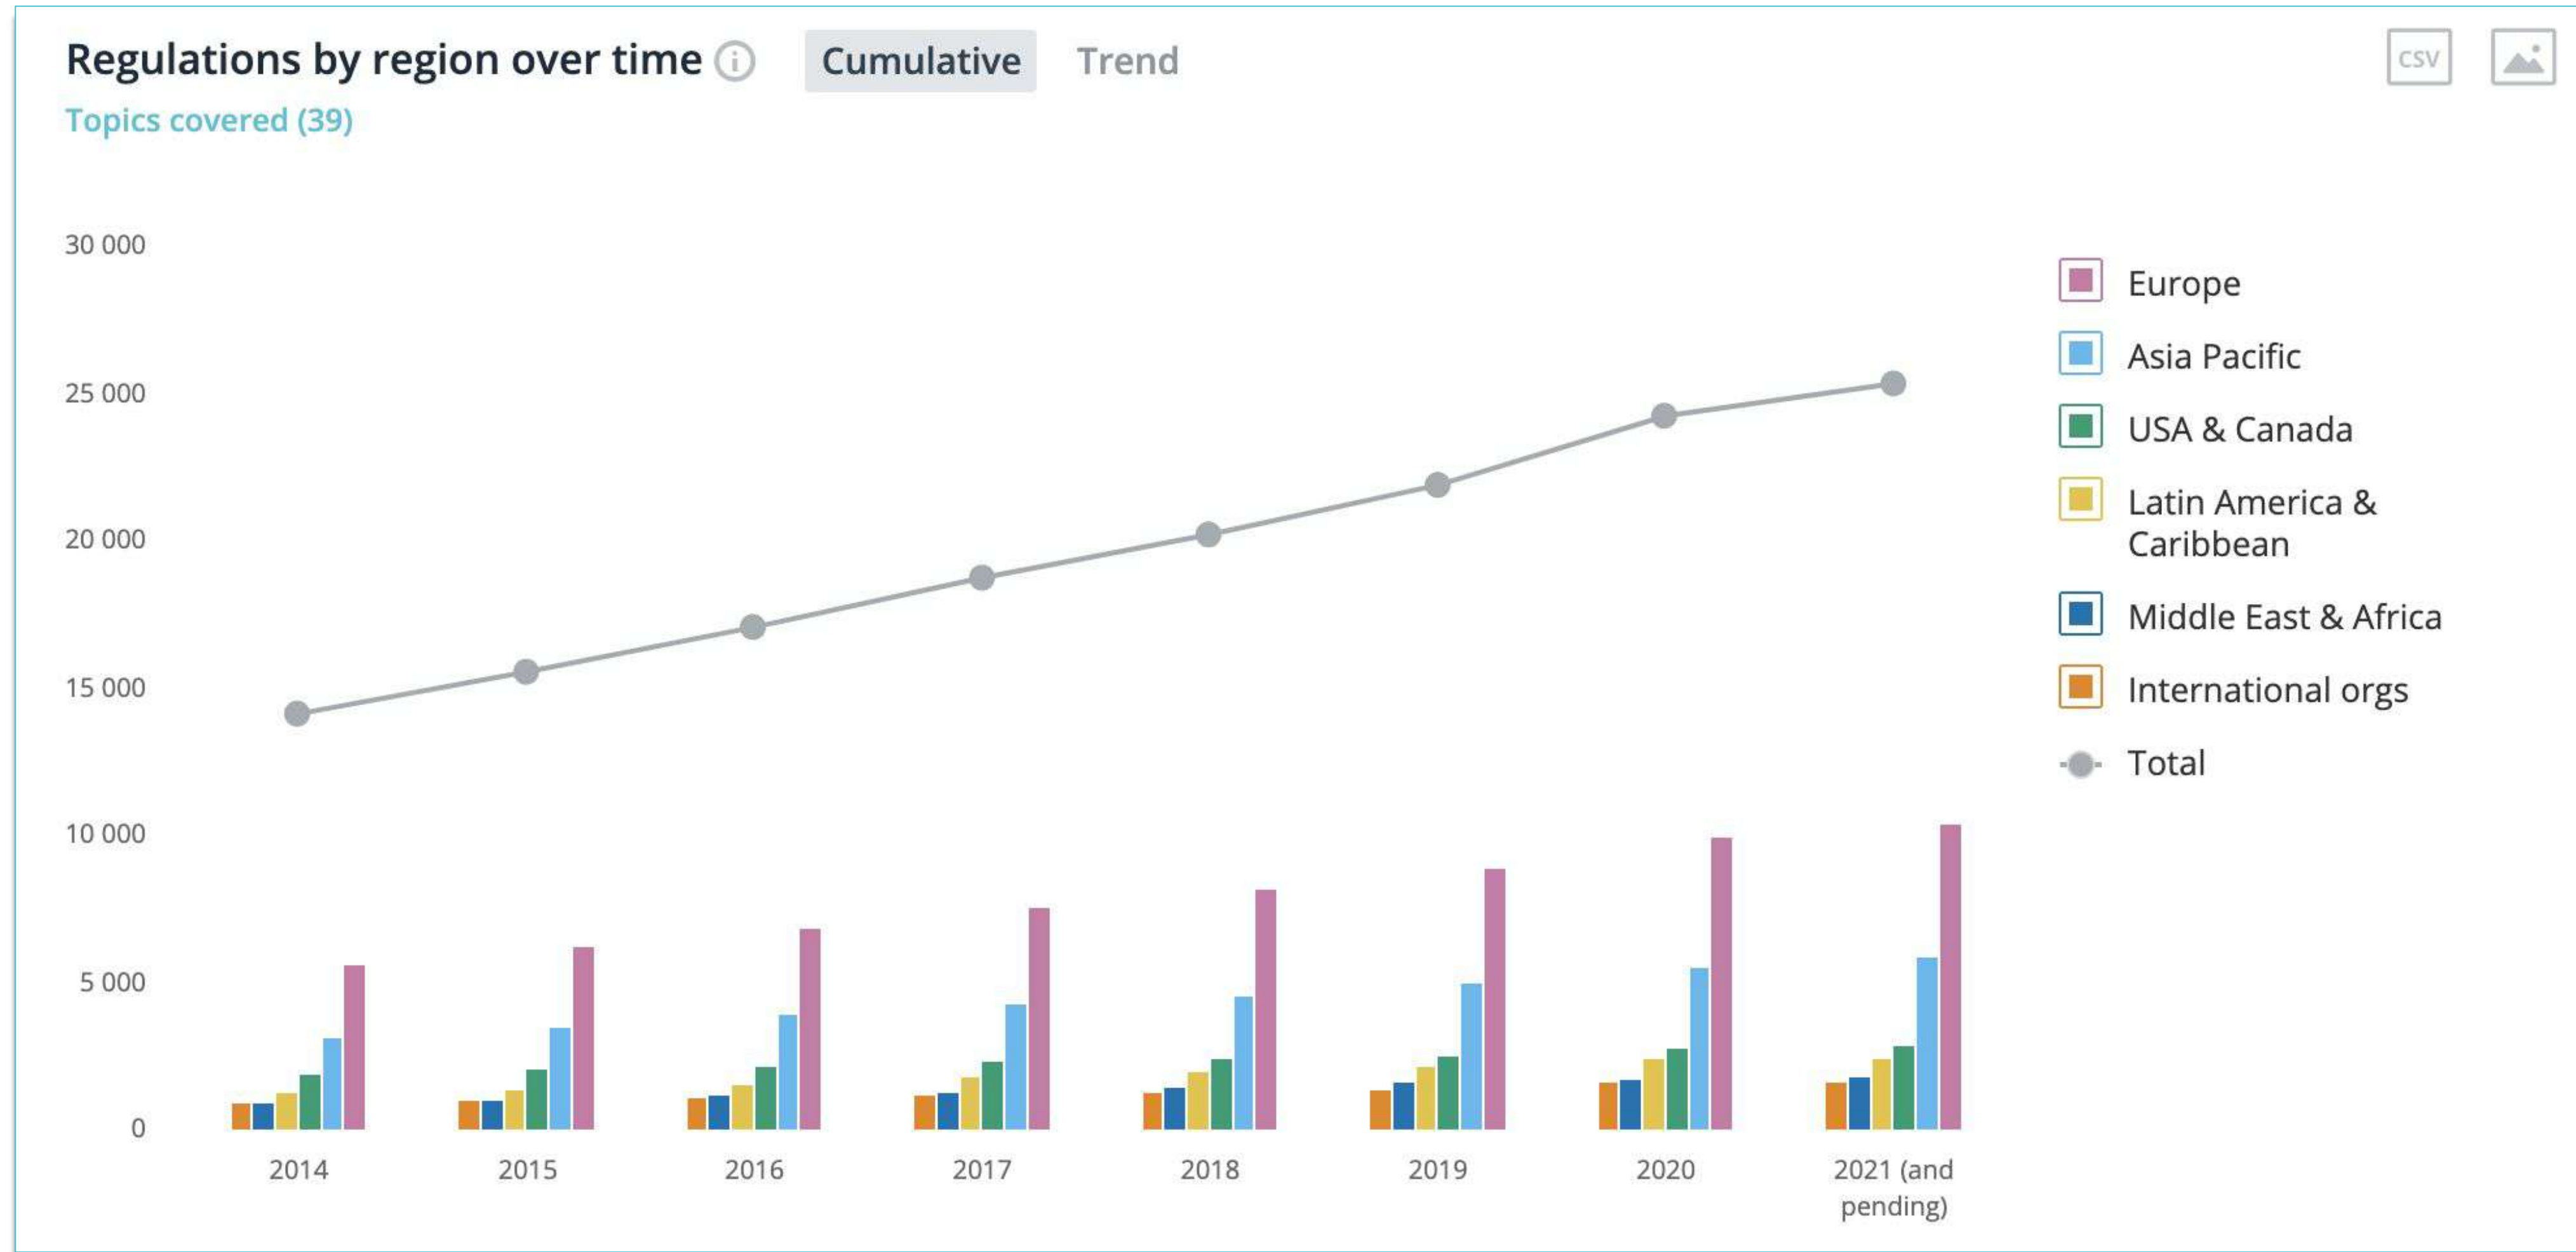

Perceived cost of poor compliance processes

- Fines & penalties

True cost of poor compliance processes

- Lost selling time
- Redesign and retesting of products
- Changing components/finding alternative suppliers
- Testing and retesting
- Rework on production line
- Stop-ship/rework in the field
- Preventative recalls (prior to non-compliance)
- Reputational damage - delays & penalties
- Share price dips following a non-compliance

Compliance & Risks - End-to-End Market Access & Product Compliance Solutions

Market Access

- Customized research
- Consider new products & countries
- Compare obligations in multiple jurisdictions
- Understand regulations at a high level or deep analysis

C2P Platform

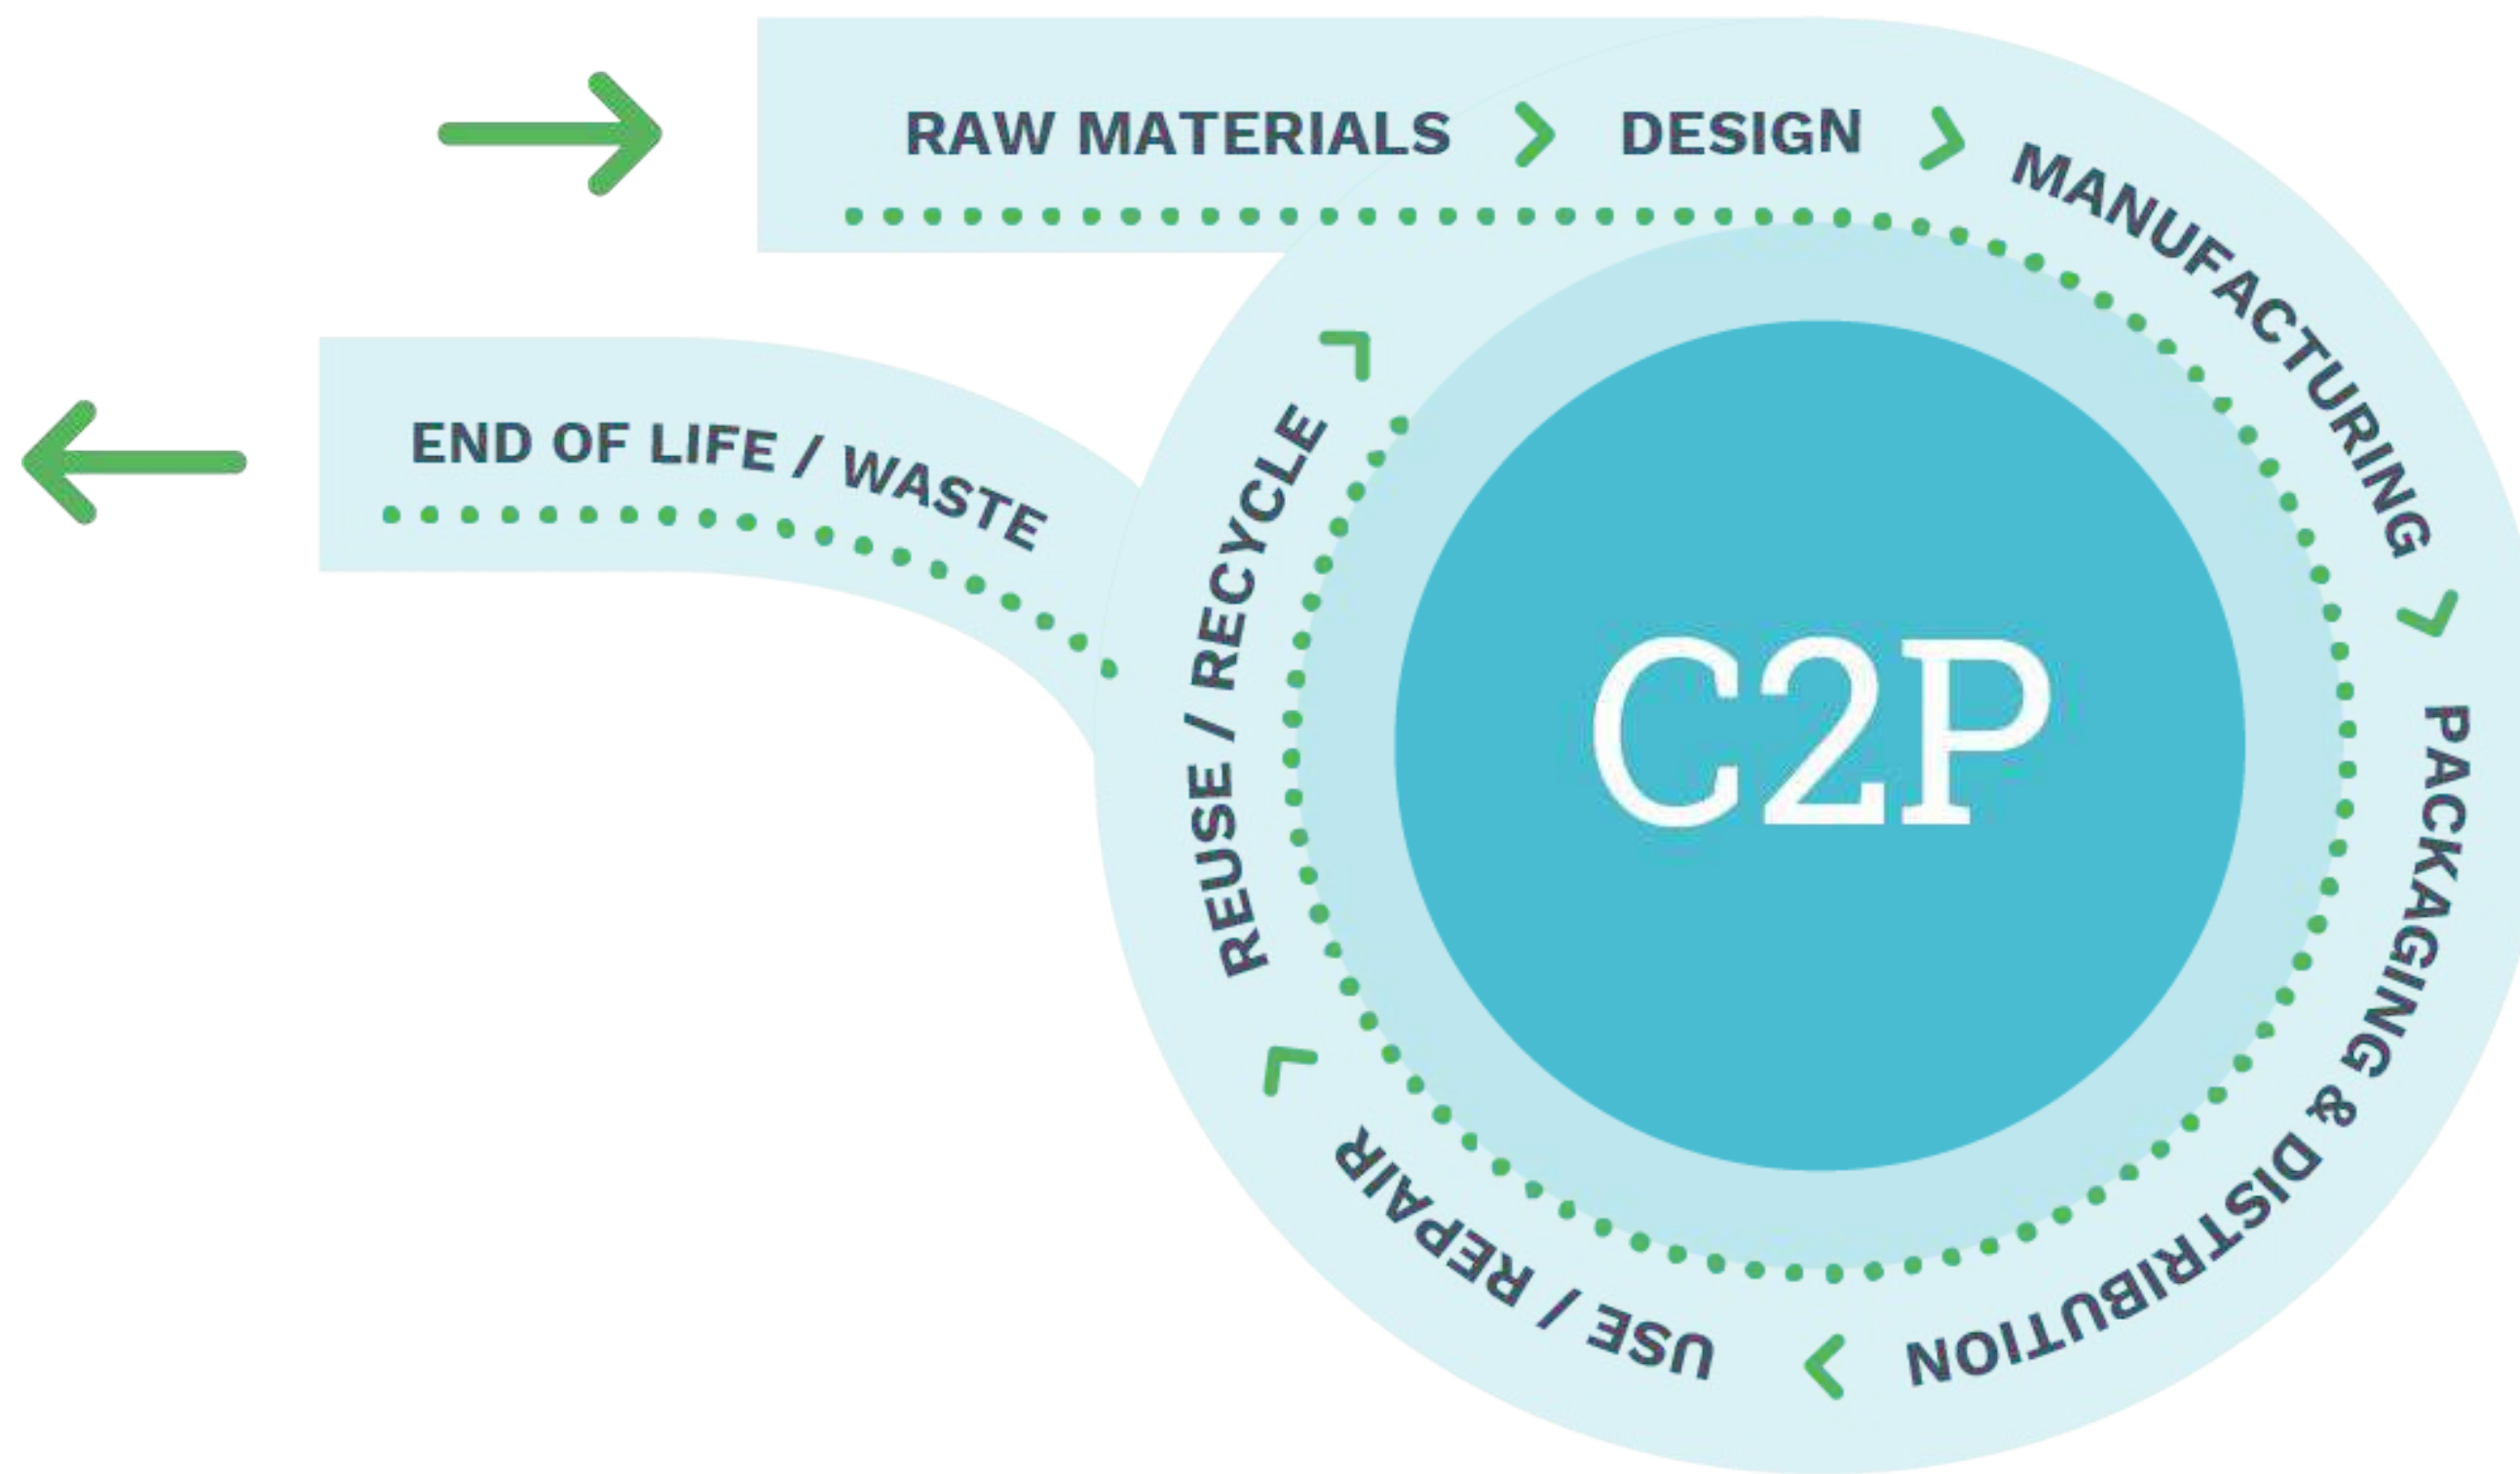

- Regulations, standards requirements & evidence
- Proposed & enacted regulations
- Global daily monitoring & alerts
- Efficient workflow tools
- Knowledge management
- SME support

Managed Services

- Fulfil specific compliance functions
- Full suite of compliance skills
- 25 languages
- On-site and/or off-site delivery

Regulatory Content

- Automotive
- Batteries
- Brexit News
- California Proposition 65

- Non-Financial Reporting Directive
- Packaging
- Product Safety
- Single-use Plastics
- Textiles
- Transboundary Movements of Hazardous Waste
- Transport of Dangerous Goods
- Water Efficiency
- Wireless

Case Study 1 - Global Consumer Electronics Brand

Client Challenges

- We need to be able to readily identify emerging product-related regulatory issues around the world, and to manage them in an efficient manner.
- We were struggling to do this as our previous setup was somewhat piece-meal and dispersed among different systems and providers.
- This made it difficult to understand if we were seeing all of the regulatory information that we needed.

Technology Solution

- Comprehensive Reg Database - 69,000 Intelligent filtering - relevant information
- Powerful search - cut through mountains of regs to ensure most relevant information is accessed to do our jobs
- Ongoing expert support - team of subject experts to reach out to with queries

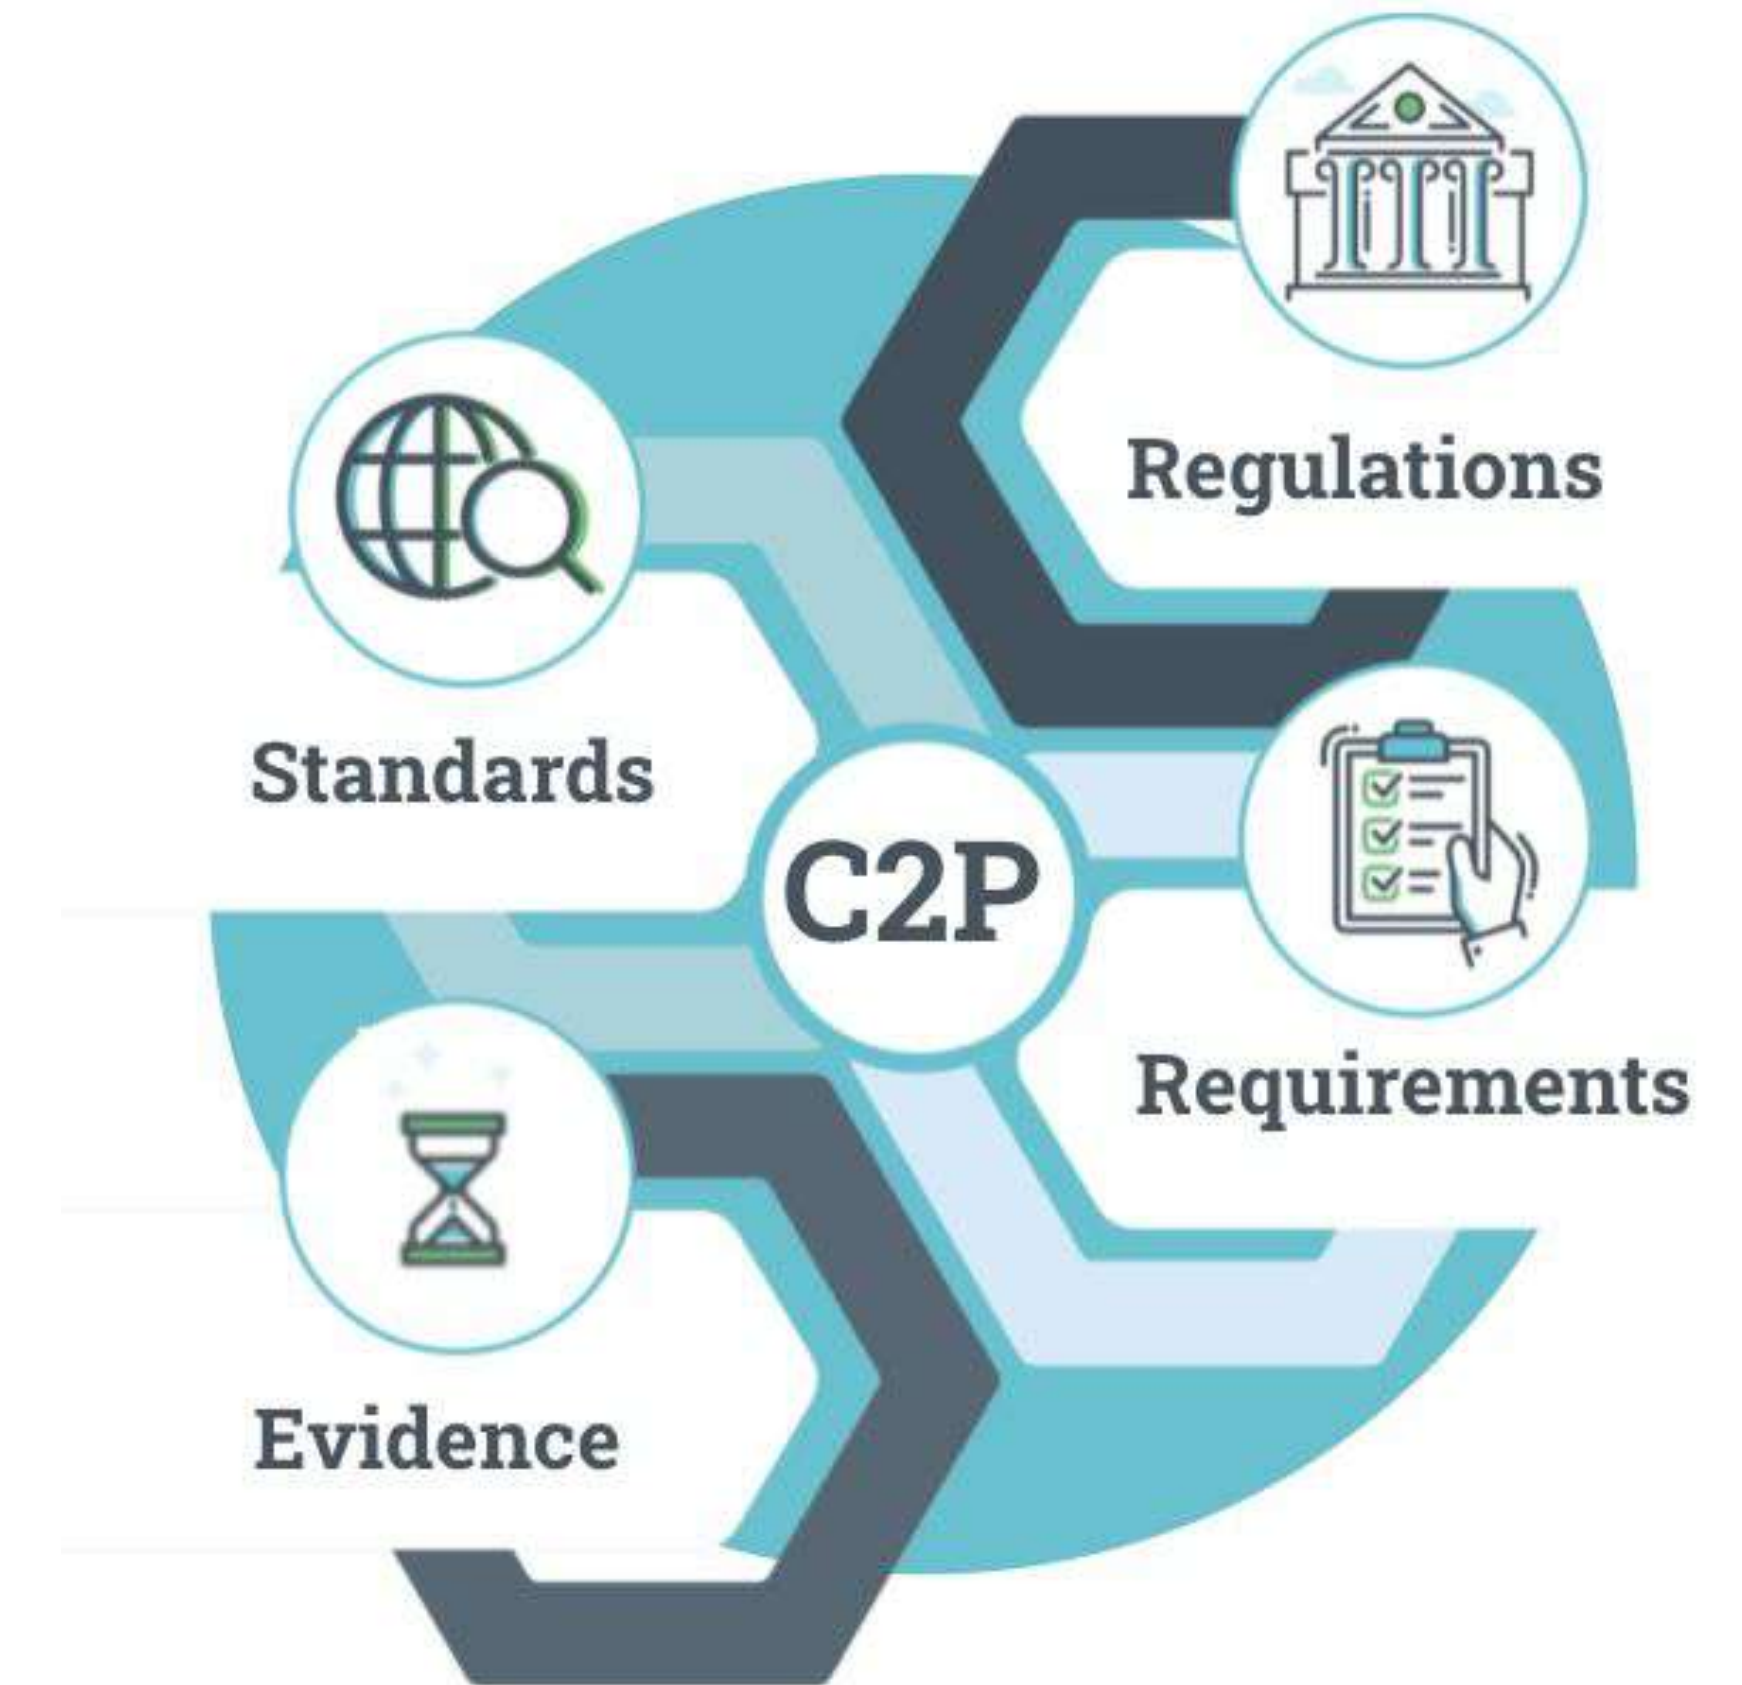

'Having a comprehensive service that provides updates on regulatory activities in all geographies across our complete product portfolio simplifies our processes tremendously.'

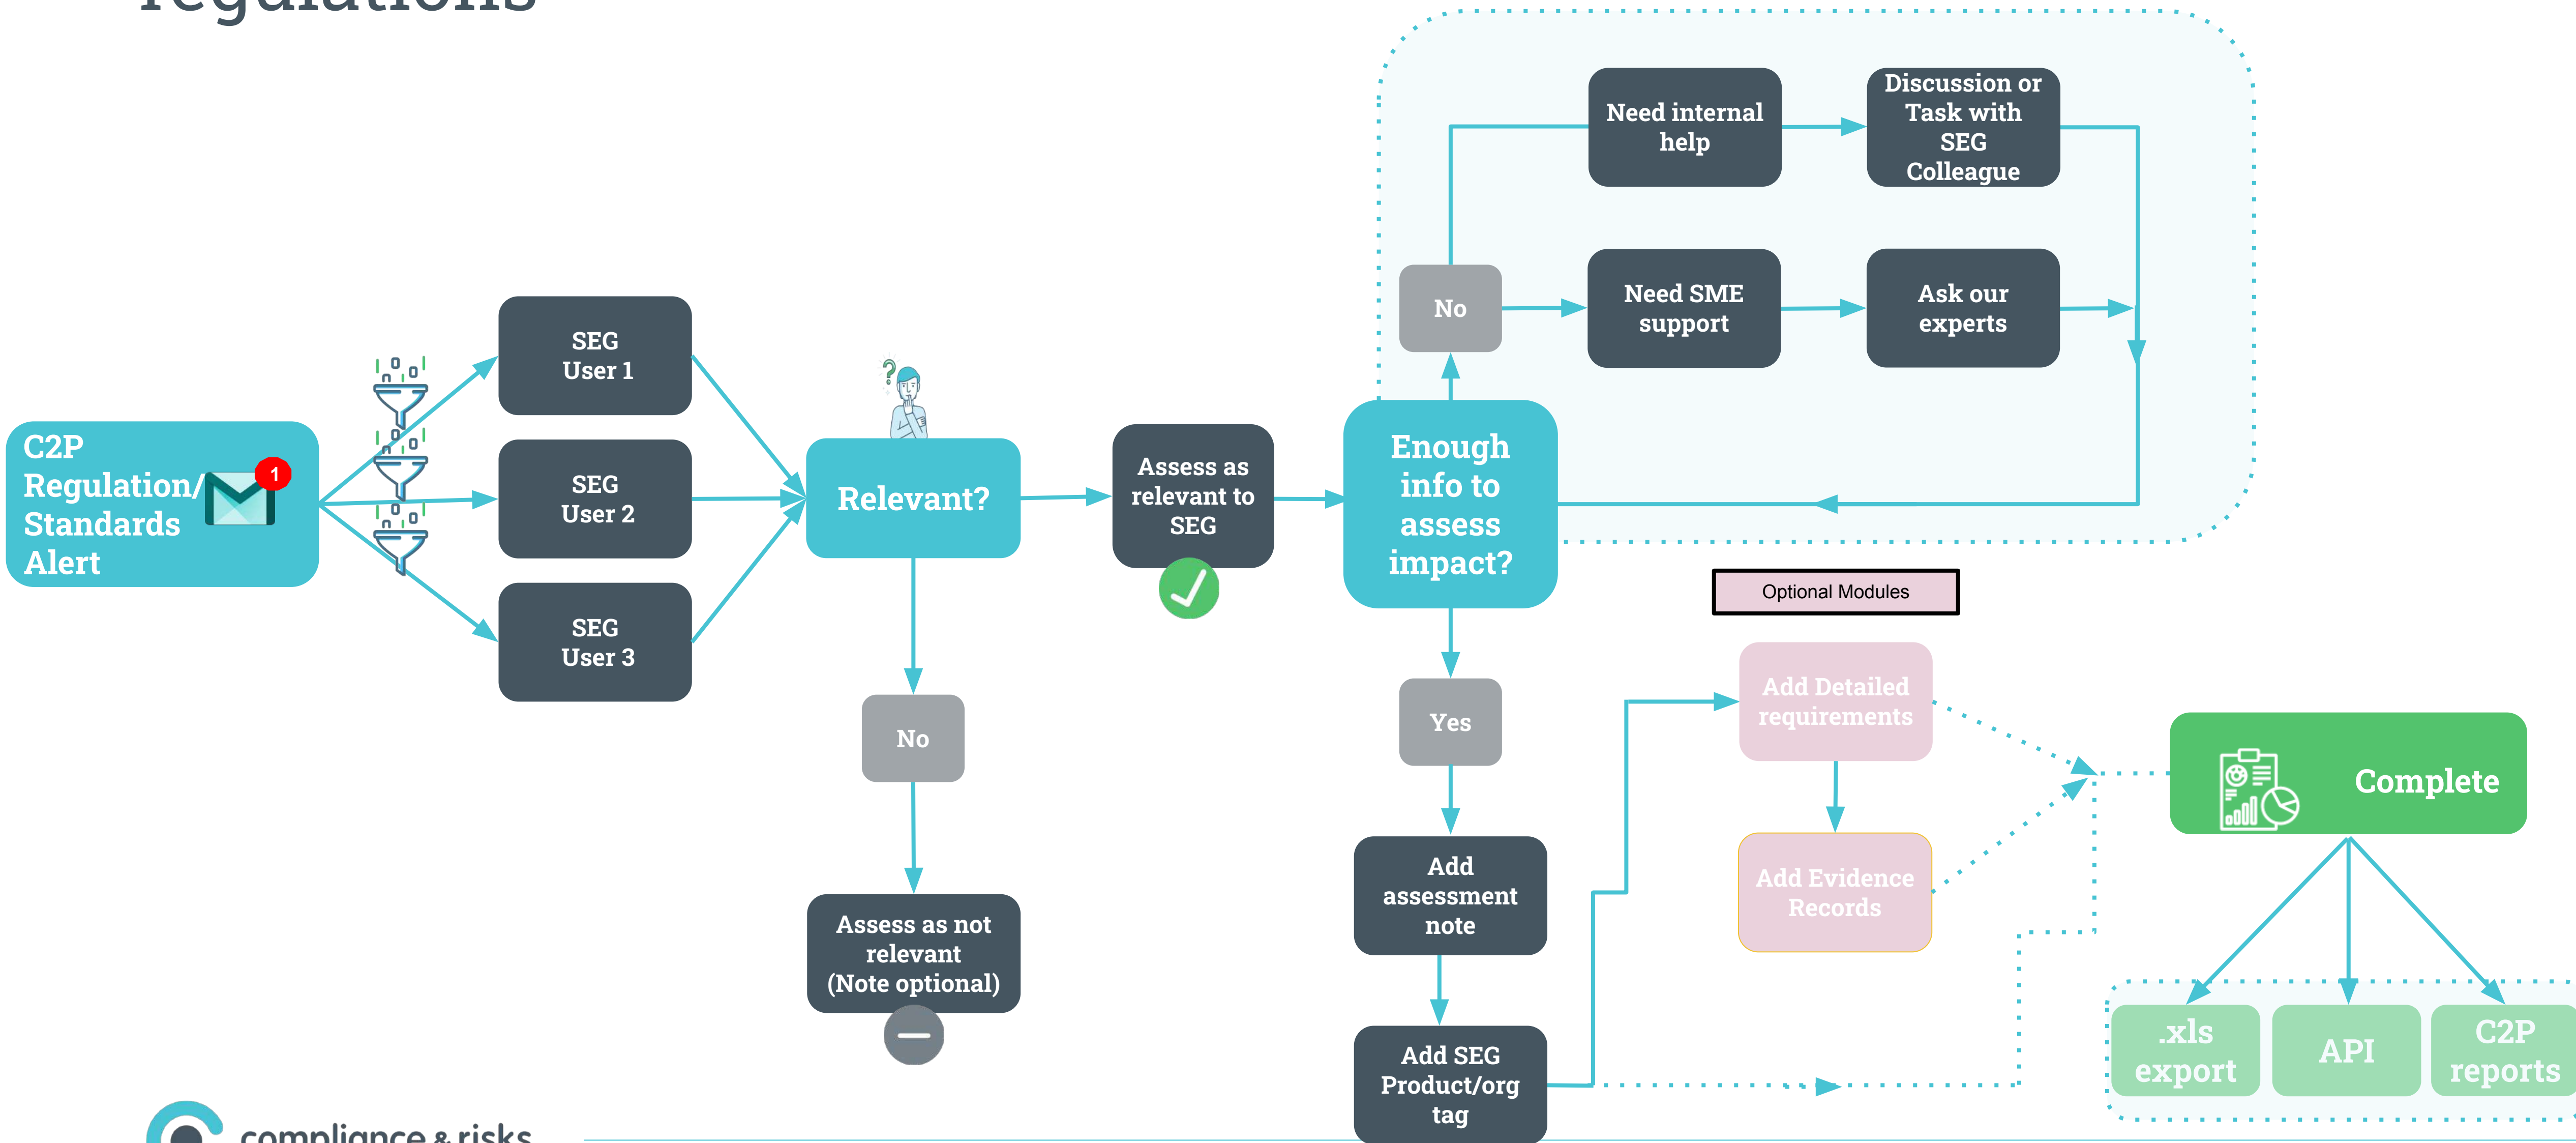

Simplify your compliance process

How Technology can help you

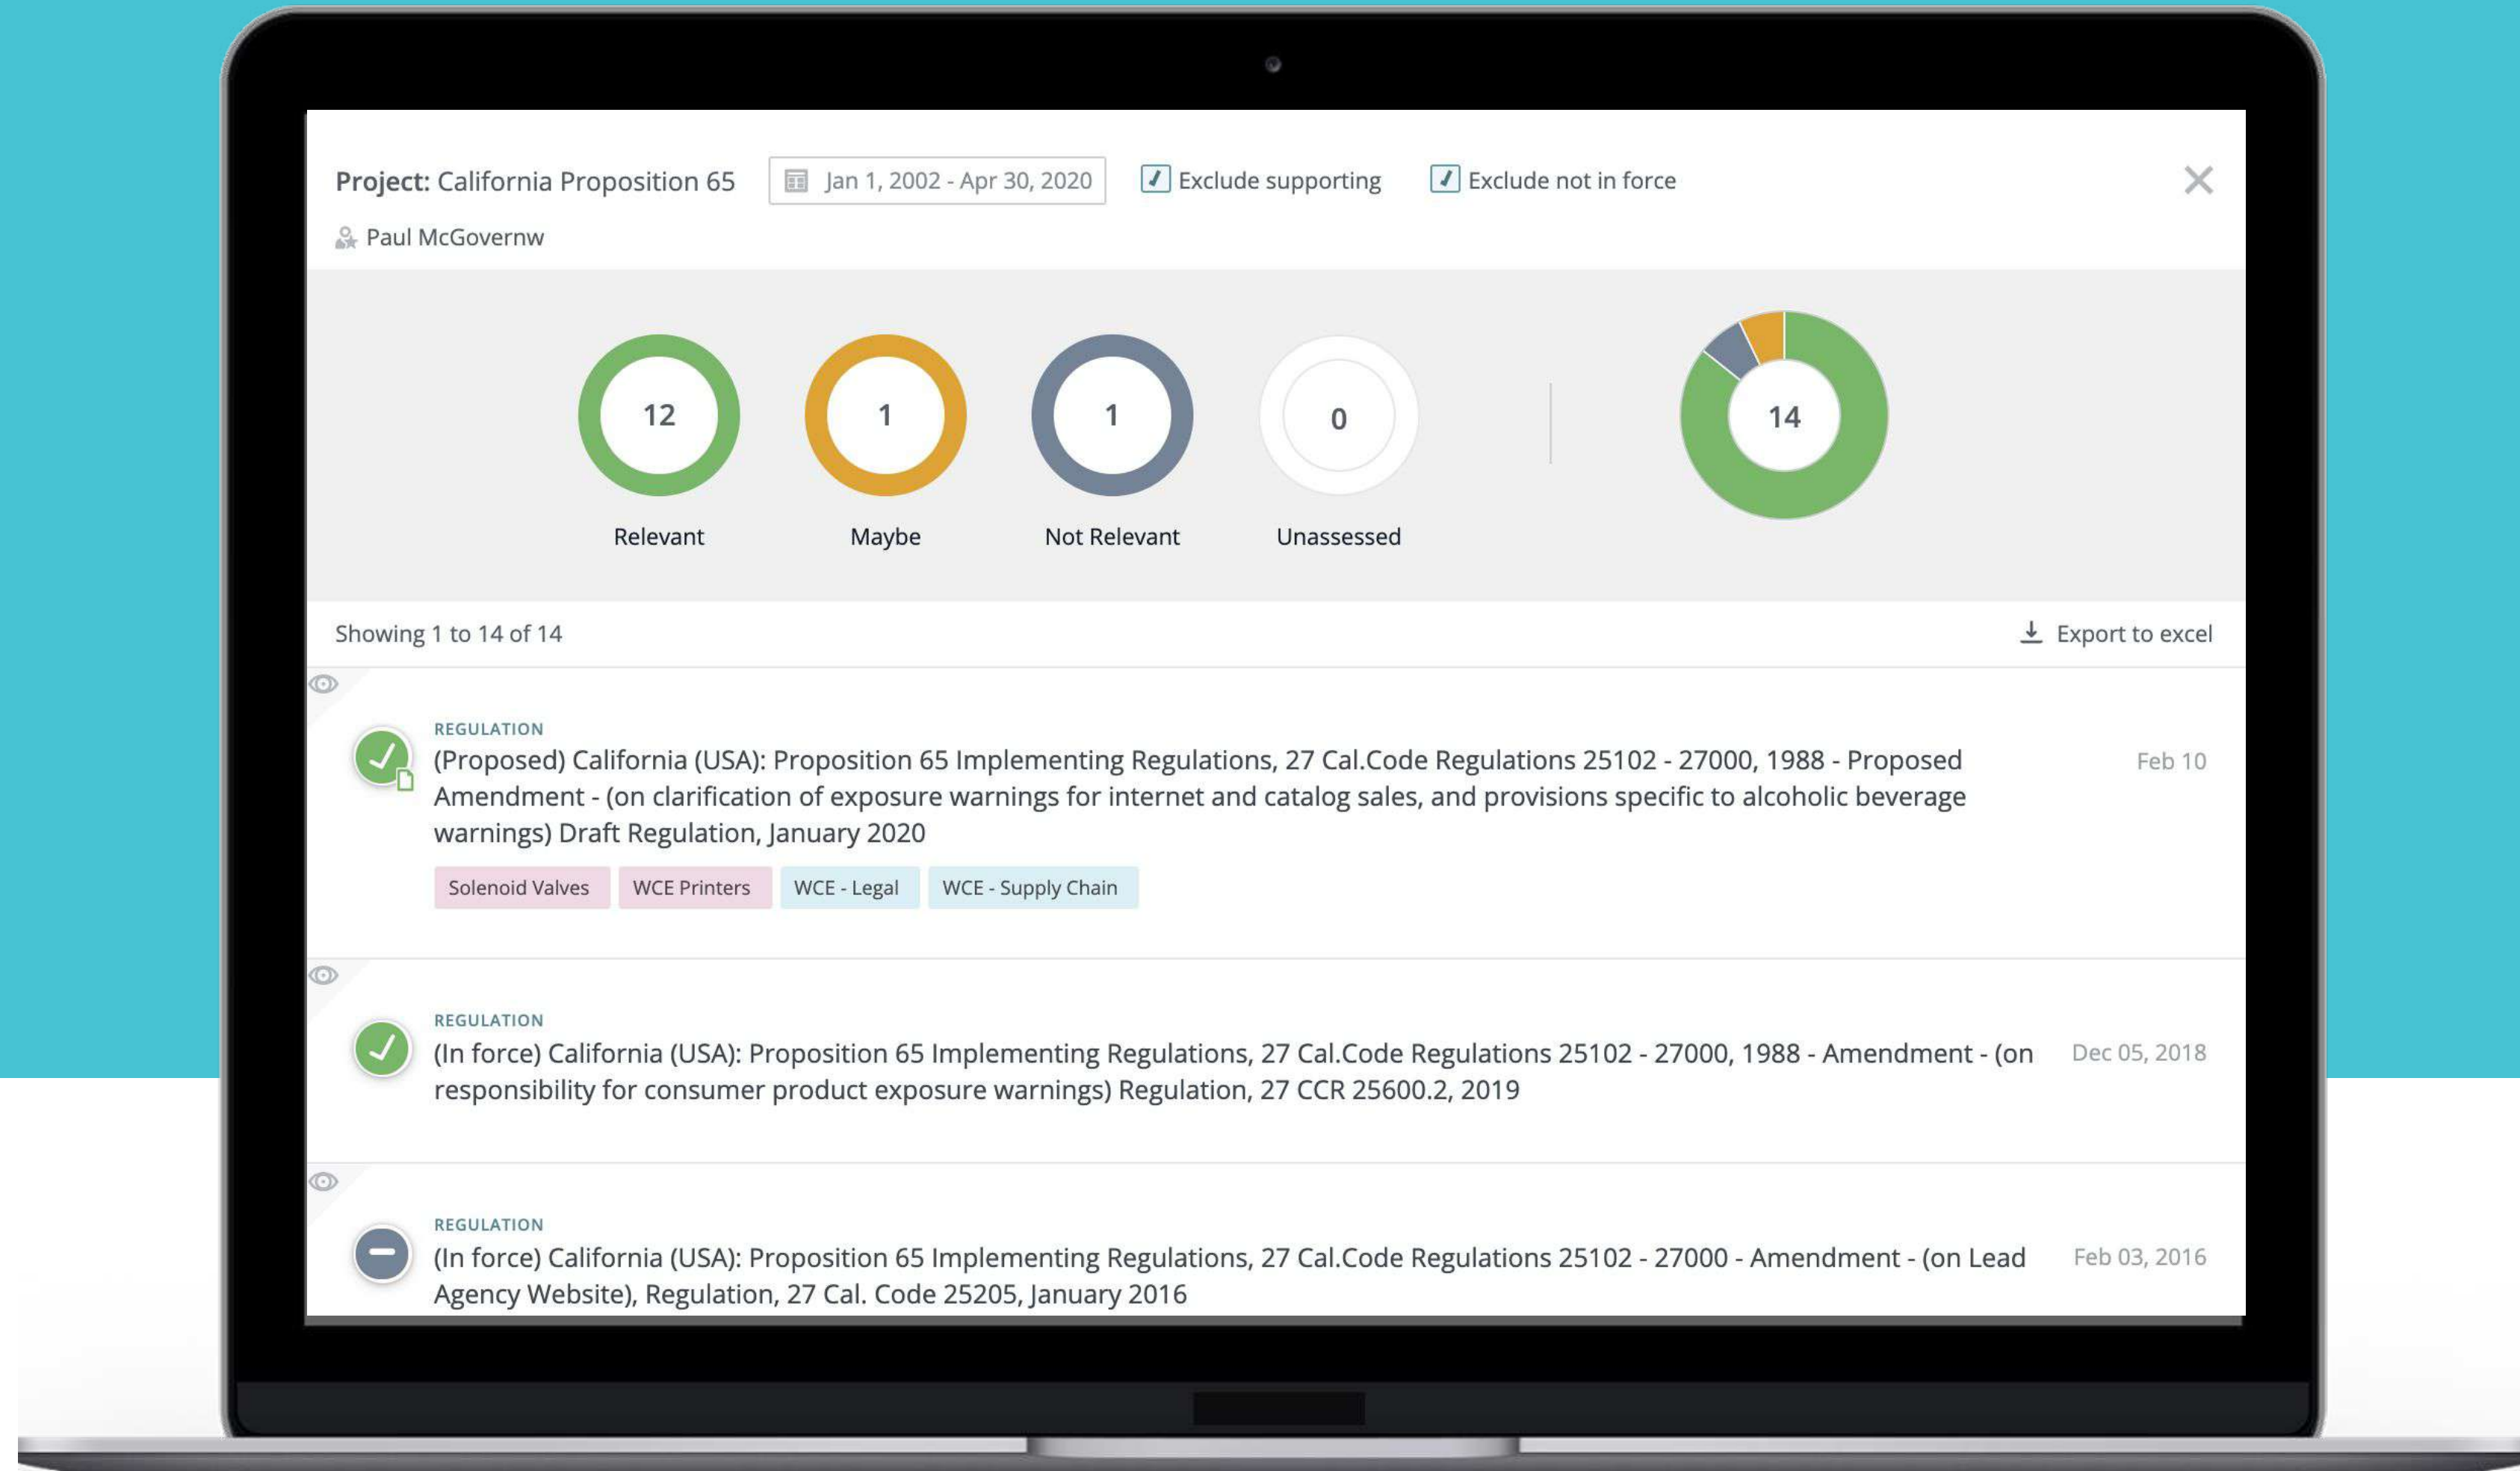

- Create a centralized process for managing compliance to changing regulations
- Assess and record the impact of those changes on your product
- Manage requirements and directly connect them to changing regulation
- Better manage your Ask our Experts, with new tools for explaining the process, linking regulatory content, and exporting responses
- Report on the work your team is doing

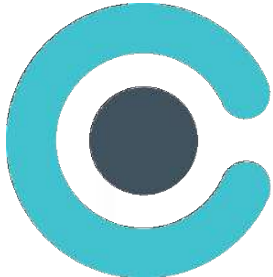

Centralize your process for managing the impact of changing regulations

Managing your compliance needs 'All in one Place'
