Top Tips!

Getting the most out of your market access solution, C2P.

### Save Time & Reduce Risk with C2P Regulations & Standards Management

C2P monitors 70,000+ Regulations and Standards around the world, and helps you manage the impact of regulatory changes on your business and products. C2P is the only global market access platform that contextually links Regulations & Standards together in one powerful, enterprise ready application.

We alert you of new and changing Regulations and Standards allowing you to assess their relevance and manage the impact throughout your organisation.

Assessment Tools

Use custom impact assessment tools to manage the impact of a Regulation or a Standard on your business
✅ You can add detailed, company specific information on each impact assessment.
✅ This along with the functionality to mark the Regulation or Standard as relevant and tag your products helps you to manage proposed Regulations and provide early warning of changes to your business.

REGULATION
(In Force) California (USA): Proposition 65 Im
to Cause Cancer or Reproductive Toxicity, 20
CAS No: 7441-21-9
High risk - Impacts supply chain

REGULATION
(In Force) California (USA): Promotion of Circ

Hi, is conformity to the standard TIS 3061-2563 mandatory for placing on market in Thailand?

Hi Lisa, I have done a complete search and found that TIS 3061-2563 is not mandatory but a voluntary standard.

Ask an Expert

Ask our Experts questions about any regulatory concern
✅ You have direct access to our expert regulatory compliance team, available to answer your questions in detail on Regulations or Standards, including purpose, applicability, products in scope, or reach out to the regulator on your behalf.
✅ Save time for your team in researching, get the right answer first time.

Act Quickly with Standards & Regulations In One Place

Contextually link Standards to act swiftly on requirements
✅ You can see which Standards are referenced in a regulation, access the Standard and manage its connection to the Regulation and your requirements.
✅ This also helps you implement changes hand in hand in time to achieve smoother market access for your product.

Team Reports

Share your team's work in a couple of clicks
✅ Report on your team's work in a simple click.
✅ Helps you to quickly extract impact assessments to share with your organisation
